Course Description
Developmental Reading 2AB (SDAIE)
(Elective)

This course is described in the High School Course of study. Based upon student needs, teachers select appropriate materials from the Instructional Materials List. Classroom presentations of course content for reading are determined by the instructor and described under Teacher Activities. Teachers are advised that the domains of listening/speaking and writing are also incorporated into the Developmental Reading Program. Reference to the standards for these domains can be found in the English Language Development Standards matrix.

Overview:
Based on the English Language Development Standards, the goal of Developmental Reading 2AB is to give the student extended opportunities to acquire reading competence in English. This meaning-centered reading program uses fiction and non-fiction at the appropriate level of English acquisition to enhance student confidence and promote reading proficiency for personal and educational purposes. The curriculum is designed for the early intermediate to intermediate English learner. The curriculum is flexible enough to allow the student to progress at her/his own speed to attain at least an intermediate level in reading, listening/speaking and writing. The student will grasp English language concepts through activities that include visuals, audiotapes, vocabulary-increasing games, role play, and other meaning-based/language-centered instruction. Through both curriculum and instruction, the student will learn to accommodate, with increasing confidence, the sociocultural similarities and differences between the native language setting of the home and the second language environment of the school.
