Overview:

The one-semester Advanced Placement Program in Comparative Government and Politics is designed to complement the one-semester course in American Government and Politics. Either program will qualify students for an equivalent one-semester college introductory course. This course is designed to help students gain knowledge of the world's diverse political structures and practices. The course encompasses the study of both specific countries and of general concepts used to interpret the key political relationships found in virtually all national polities. Five countries form the core of the examination: Great Britain, France, Russia, China and a choice among India, Mexico and Nigeria.

Comparative political inquiry requires an understanding of the different constitutional, ideological, and social bases of political legitimacy, the sources of public authority and political power, the relationship between state and society, the relationship between citizens and their states, political and institutional frameworks, and political change. This course requires that students understand basic methodology in which they look beyond similarities and differences to see the reasons for them and their political consequences in the different countries.
