Cigna Dental Oral Health Integration Program®

We make it easier to stay on top of Sjogren’s syndrome symptoms.

Take advantage of reimbursements* for periodontal (gum) treatments, fluoride applications, sealants and more.

Together, all the way.*
Get reimbursed* for dental treatments. Help improve oral health.

The oral manifestations of the disease mean that dentists are often the ones to detect Sjogren’s syndrome. To keep common oral symptoms under control, we reimburse* periodontal (gum) treatments, fluoride applications, sealants and more.

How Sjogren’s syndrome affects oral health**

The Cigna Dental Oral Health Integration Program may not be available under your specific plan. Reimbursement under OHIP is subject to plan terms and conditions, including applicable annual benefit maximums and other exclusions and limitations. For costs and details of coverage, contact your Cigna representative or see your plan documents.

How the reimbursement process works

1. Enroll
To get reimbursed, you first have to enroll in the Cigna Dental Oral Health Integration Program* by either:

› Going to myCigna.com, selecting Coverage > Dental and filling out the registration form online
› Calling the number on the back of your Cigna ID card and asking for a mailed registration form

2. Submit your claim
Go to your dentist and pay the copay or coinsurance for the covered treatment. If your dentist is in the Cigna network, they’ll send us a claim for reimbursement. If your dentist isn’t in the Cigna network, you might need to submit the claim. We’ll review the claim and mail full reimbursements for covered treatments in about 30 days.
