Get reimbursed* for dental treatments. Help improve oral health.

As ALS progresses, what used to be simple tasks can become more difficult. To help make the oral health part of the journey easier, we reimburse* periodontal (gum) treatments, fluoride applications, sealants and more.

How ALS affects oral health**

1. **TROUBLE MAINTAINING DENTAL ROUTINES**
   Since ALS affects the functioning of the hands and arms, brushing and flossing aren’t as easy as they used to be and it’s more difficult to keep the mouth clean.

2. **DRY MOUTH**
   Mouth breathing, BIPAP use and certain ALS medications can cause dry mouth, which can lead to mouth sores, gum disease and tooth decay.

3. **DIFFICULTY SWALLOWING**
   If saliva isn’t swallowed, it accumulates in the mouth. This causes plaque and bacteria to build up and can lead to cavities, gum disease and, if bacteria enters the lungs, pneumonia.

How the reimbursement process works

1. **Enroll**
   To get reimbursed, you first have to enroll in the Cigna Dental Oral Health Integration Program® by either:
   - Going to myCigna.com, selecting Coverage > Dental and filling out the registration form online
   - Calling the number on the back of your Cigna ID card and asking for a mailed registration form

2. **Submit your claim**
   If you visit an in-network dentist, they’ll send us a claim directly. If you see a dentist not in the Cigna network, you may need to submit the claim yourself. Then we’ll review it and refund you for eligible dental services in about 30 days.
