What is preventive care?
Preventive care is a specific group of services recommended when you don’t have any symptoms and haven’t been diagnosed with a related health issue. It includes your periodic wellness exam (check-up) and specific tests, certain health screenings, and most immunizations. Most of these services typically can take place during the same visit. You and your health care provider will decide what preventive services are right for you, based on your:
› Age
› Gender
› Personal health history
› Current health

Why do I need preventive care?
Preventive care can help you detect problems at early stages, when they may be easier to treat. It can also help you prevent certain illnesses and health conditions from happening. Even though you may feel fine, getting your preventive care at the right time can help you take control of your health.

Make a plan for preventive care.
Use this space to write down the details for your next periodic wellness exam.

What’s not considered preventive care?
Once you have a symptom or your health care provider diagnoses a health issue, additional tests are not considered preventive care. Also, you may receive other medically appropriate services during a periodic wellness exam that are not considered preventive. These services may be covered under your plan’s medical benefits, not your preventive care benefits. This means you may be responsible for paying a share or all of the cost. This may include your plan’s deductible, copay or coinsurance amounts, depending on your plan.

Which preventive services are covered?
Many plans cover preventive care at no additional cost to you when you use a health care provider in your plan’s network. Use the provider directory on myCigna.com for a list of in-network health care providers and facilities.

See the charts on the following pages for the services and supplies that are considered preventive care under most health plans. For more details, please check your plan materials.
### Wellness exams

<table>
<thead>
<tr>
<th>SERVICE</th>
<th>GROUP</th>
<th>AGE, FREQUENCY</th>

1. Subject to the terms of your plan’s pharmacy coverage, certain drugs and products may be covered at 100%. Your doctor is required to give you a prescription, including for those that are available over the counter, for them to be covered under your Pharmacy benefit. Cost sharing may be applied for brand-name products where generic alternatives are available. Please refer to Cigna’s “No Cost Preventive Medications by Drug Category” Guide for information on drugs and products with no out-of-pocket cost.

2. Subject to the terms of your plan’s medical coverage, home blood pressure monitoring supplies, breast-feeding equipment rental and supplies may be covered at the preventive level. Your doctor is required to provide a prescription, and the equipment and supplies must be ordered through CareCentrix, Cigna’s national durable medical equipment vendor. Precertification is required for some types of breast pump equipment. To obtain home blood pressure monitoring equipment, breast pump and breast pump supplies, contact CareCentrix at 844.457.9810. Examples include oral contraceptives; diaphragms; hormonal injections and contraceptive supplies (spermicide, female condoms); emergency contraception.

3. Subject to the terms of your plan’s medical coverage, contraceptive products and services such as some types of IUDs, implants and sterilization procedures may be covered at the preventive level. Check your plan materials for details about your specific medical plan.

4. Subject to the terms of your plan’s medical coverage, contraceptive products and services such as some types of IUDs, implants and sterilization procedures may be covered at the preventive level. Check your plan materials for details about your specific medical plan.

These preventive health services are based on recommendations from the U.S. Preventive Services Task Force (A and B recommendations), the Advisory Committee on Immunization Practices (ACIP) for immunizations, the American Academy of Pediatrics’ Periodicity Schedule of the Bright Futures Recommendations for Pediatric Preventive Health Care, the Uniform Panel of the Secretary’s Advisory Committee on Heritable Disorders in Newborns and Children and, with respect to women, evidence-informed preventive care and screening guidelines supported by the Health Resources and Services Administration. For additional information on immunizations, visit the immunization schedule section of [www.cdc.gov](http://www.cdc.gov). This document is a general guide. Always discuss your particular preventive care needs with your doctor.

Some plans choose to supplement the preventive care services listed above with a few additional services, such as other common laboratory panel tests. When delivered during a preventive care visit, these services also may be covered at the preventive level.

### Exclusions

This document provides highlights of preventive care coverage generally. Some preventive services may not be covered under your plan. For example, immunizations for travel are generally not covered. Other non-covered services/supplies may include any service or device that is not medically necessary or services/supplies that are unproven (experimental or investigational). For the specific coverage terms of your plan, refer to your plan documents. If there are any differences between the information displayed here and the official plan documents, the terms of the plan documents will control.
