COURSE DESCRIPTION:

Students move to a higher level of competency and are tasked to complete a capstone project which can include an independent research paper on a question or problem of their choice with the guidance of a faculty mentor, or participate in an internship. Some samples of previous projects include designing and building tiny houses for our veterans and homeless, playhouses that are donated to local children’s non-profits, sheds for neighborhoods, doghouses for local rescue organizations, and special projects such as snack-shacks and benches for their campuses. While learning a trade, students are making our communities a better place to live.

| IV. | CAPSTONE PROJECT: PRODUCT |
|----|---------------------------|CR|Lab/CC|Standards|
• Identify steps to project completion, with timelines
• Generate a materials list with costs
• Identify team roles and responsibilities
• Rotate leadership roles
• Elicit regular feedback from faculty and/or industry mentor
• Demonstrate critical thinking and research skills to solve problems
• Provide documentation of each step (blueprints, photos, journal notes, etc.) in a timely fashion
• Adhere to all safety standards to create a safe work environment
• Demonstrate safe use and proper care of all tools and equipment
• Demonstrate advanced skills in construction

V. PROJECT PORTFOLIO

• Assemble a portfolio that includes all project documentation
• Develop a multimedia presentation that identifies the problem, explains steps in the construction process, and presents the final project
• Present projects to industry and/or faculty mentors, and receive feedback/answer questions
